Dear Mr. Nyship REGARDING 8/17/17
MVP
This is to the entire insurance department
The state of NY used to be such a nice
place to work, get benefits. But now we suffer
at the hands of the politicians, insurance
companies, and even the state itself. An
increase when times are so hard for
everyone. Gas prices high. Maybe
Cuomo should do a little more without
like he wants the rest of us to do.
Our household now have to choose
who gets what medications. We just
can't buy it anymore. As of January
2011 MVP changed my one drug, put
it in a tier - now charges $132.00
a month. Tried generic - do not work.
Sorry, but all generics are not created
equal. Sometimes they are weak and you
have to take too many. Even generic
drugs are going up. Yes the state
sold us, state workers, out to the in-
surance companies. Why should they get
increases, increase price of medications

and copay us to death.

The single people better not ever have families. What's really bad is paying high rates with no dependent children. Like school taxes with no children in the schools. You go to the doctor, they get you out of their offices in 5 minutes, maybe ten — then charged $20.00-$40.00, then send you to a specialist — $20.00 — 40.00 more. Now comes the pharmacy — don't know how much that will be $10, $25, $30, 50, $100 or more. Or, change your mind and hope an over the counter drug will work. Does any of the politicians have to make such choices. Do they have to compromise? The answer is no, no, no, — they don't suffer at all — never did. If you don't want us to see doctors just say so.

P.S. GENERICS DO NOT WORK! INFERIOR! STUCK NOW I HAVE TO PAY $132.00 TO FUNCTION! WHY!

Thanks for looking out for us!
