I am already paying over \$300 per month for a supplemental Aetna plan and nearly \$100 per month for a Rx plan .My medicatio for diabetes,hypertension and bipolar disorder are very expensive. I can barely afford the insurance fees now along with expensive co-pays for meds.An increase would be a tremendous hardship .Please consider my request NOT to increase monthly premiums .

I am writing regarding the rate increase that Aetna Medicare supplement has requested. I have been on disability for 2 short years- my medicare kicked in not even a year and a half ago. I have already experienced close to a 15% increase on this plan. I am a [REDACTED] yr old mother with 2 small children.... another increase- how am I to afford the basics for my children? Didnt they just increase this last year? the disability payments are not getting 15% every year so how can the premiums for long suffering people go up that much? where am I supposed to get my pay raise from? Please hear my pleas and do not allow this increase.. we on disability have so many problems already why are we adding more to our already stressful lives. Thanks so much for understanding.

My previous submission was not complete so I resubmitting another comment. An increase in my monthly premium would be a terrible financial burden to me .The cost of the existing premium (over \$300 per month for supplement coverage) and a Rx plan (nearly \$100 per month) and exorbitant co-pays for medications have become insurmountable .I cannot work with my present physical condition post [REDACTED] .An increase will make it merely impossible for me to continue to afford coverage and med taking. Please consider not increasing my premium .I am at my wit's end and don't no where to turn .
