Please don't increase the rates. My pay is not increasing fast enough to keep up.

Please don't raise the rates any more I can barely make it now at 404.03 a month.
I only make 450.00 a month and this is killing me.

Please why can't NY state make a policy that is cheap for everyone who needs insurance..

Thanks for your time and reading this but please don't raise it.

To whom it may concern:

I have had this insurance for less than 2 years, and this is already the 3rd rate increase! I earn less than \$400/mth, yet my insurance costs me almost \$220/mth! I cannot afford another increase. I would like an explanation of why my rates are increasing when my usage is not. Where are we going to draw the line? Will my insurance just keep increasing until I just give up and go without?

Help!

I am just able to make my health insurance payments. With another rise in costs I would have to drop my coverage completely. We live in the real world, insurance companies need to adjust their realities and come down from their bubble to join us in the real world. Best Wishes
