Subject rate increase State Farm supplemental

The fact that 13.1% rate increase is even being considered is outlandish!

I have no problem with a small increase but this amount is ludicrous!!

As a senior I wish to take good care of myself but constant raises in supplemental insurance make me think twice about getting checked too often. I have long term insurance also and feel I am well covered but should not be getting constant raises for benefits.

I have no problem with State Farm insurance - very nice people are employed by their company but I do hope

you totally re-consider the huge amount they are requesting. I'm certainly not alone in this request.

My e-mail is [REDACTED] and I hope you will reply that 13.1% is definitely not considered.

Thank you.
