### **Loss Ratio for Small Group Coverages**

Without expected credits from the Market Stabilization Pool, the small group HMO product's projected loss ratio for customers with rate increases effective for the 4 quarters provided in this filing (1Q2013-4Q2013) would be 88.2%.

As a result of the pooling methodology established by the Fifth Amendment to Regulation 146, we have included a credit of 0.5% of premium for 1Q2013-4Q2013. Therefore, our projected loss ratio adjusted for this reimbursement from the pool is 87.7% (projected loss ratio less reimbursements). This reflects actual membership, premium, and claim experience since our submitted plan as well as adjustments for lapses and buy-downs per our plan. Note that we expect the loss ratio for all four quarters of renewal experience during 2012 including the credit from the market stabilization pool to be in excess of the 82% statutory minimum. The claim trend assumptions underlying this analysis are 11.2%.

The administrative expense assumptions underlying this analysis are approximately 13.6%, comprised of 3% for commissions, 1.9% for premium taxes with the remaining 8.7% for other selling and general administrative expenses.
