Health Bureau-Premium Rate Increases

Please be advised that my Empire Heath Choice "Plan A" premium has increased, in one year, from $441.30 to the proposed $557.73 which totals $465.72 annually.

This one year increase far exceeds the CPI and exceeds my ability to pay. I am [redacted] year old retiree on a fixed income that actually declines resultant inflation.

Empire's proposed rate increase is grossly unfair and unjustified.

Thank you.

In the matter of subject rate increase, kindly note same is well beyond CPI (1.6% for January 2012 through January 2012), and has become an annual right-of-fleeing-the-policy-holder by Empire. Empire HealthChoice Assurance, Inc. doesn't quantify, qualify or otherwise justify the increase with any references to its costs, stating only, "Each year, rising medical costs and the growing use of medical goods and services combined, drive health care costs higher. To keep up with these increasing costs, we must modify premium rates for your Medicare Supplement plan, tentatively effective on January 1, 2014."

In it's submission to NY DFS, Empire stipulates
Dear Sir or Madam,

Ref. Medicare Supplement Plan B

Please consider and reject the proposed Empire BlueCross, BlueShield insurance rate increase slated for January 1, 2014. My mother [redacted], who will be [redacted] years old this year, lives primarily on her Social Security and this rate increase will be prove to be an unreasonable burden. This especially after the rate increase just last year. This new proposed increase will literally wipe out the small cost-of-living increase she received from Social Security this year.

Thank you.

Most Sincerely,

From:
My wife and I are very concerned about Empire's recent announcement concerning their pending rate increases effective 1/1/2014! We are barely getting by with the 2013 increases! This additional request will bump our rates by 15%. There is no justification for an increase this LARGE! We strongly suggest that DFS refuse to grant an increase of this size!! Thank you.

To whom it may concern:

I am writing this on behalf of my mother [REDACTED] of [REDACTED].

Attached is a letter from Empire BC/BS. It is in reference to a Proposed Rate increase of nearly 10 per cent of what her current premium is. She just has a premium increase last November 2012. Now Empire BC/BS is requesting an increase of close to $60.00 (nearly 10%).

This is ridiculous and outrageous. Where will she obtain these monies to cover this increase?

Please do whatever is in your power to see that this request is not approved.
Good Day,

I am appealing your rate increase for my mother, [redacted], who cannot speak for herself now. I am her advocate for several years. She is in a nursing home and this additional insurance cost is quite extensive. I have to pay this separately for the entire year.

I am my mother’s health care proxy, and I know that she needs to have this coverage continued.

I have to also pay my own insurance which is an added burden for a working person.

Please waive this increase for my mother, as she has been a customer of yours for so many years, and she really needs your added coverage at this point in her life.

Thank you.

Good Day,

I am writing on behalf of my mother [redacted].

I received yet another increase notice in the mail pertaining to her Plan B insurance.

Why are elderly people getting these incessant increases?

She is in a nursing home.

Thanks for the opportunity to comment on the newest proposed increase. Empire increased the premium last year by about $12 a month and now proposes to increase it again by almost $25 a month. This is unconscienable. $37 in 2 years! Seniors cannot afford this and at this age, it's especially important to keep the doctors we've been seeing for many years, so we need Medigap policies rather than Medicare Advantage, and we need them to be affordable. Please do not approve this rate increase.

Thank you,

I have Empire Mediblue Freedom 1 (PPO). Rate increase from 2012 to 2013 is astounding. Copay for specialist office visit is greater than 50% of the negotiated payment to the provider. The monthly premium for the insured is $38.00 for policy; versus $0 dollar premium in year 2012. I ask NYS DFS to review these dramatic increases for rollback consideration and not be bullied by ins. carrier muscle and fancy powerpoint data showboating.
I. OVERVIEW
Empire Blue Cross (Empire) has submitted an application to the Superintendent of Insurance to adjust premium rates for health insurance available to Medicare Supplement enrollees. The line of business impacted is the 2010 Standardized Medicare Supplement Insurance Plans sold by Empire HealthChoice Assurance, Inc. (Empire’s insurance company; NAIC code number 55093). The actual rate increases requested are provided below. Empire's proposed rates are subject to review and approval by the New York Department of Financial Services, with the determination by the Department supported by sound actuarial assumptions and methods. The rate application will be filed with the Department on June 6, 2013 (SERFF number: pending). The actual rate increases approved will be communicated to the impacted parties upon completion of the Department’s review and are scheduled to be effective beginning on January 1, 2014.

The proposed rates are applicable to individuals enrolled in a Medicare Supplement plan on or after June 1, 2010. Rates are expected to be in force between January 1, 2014 and December 31, 2014. All members will receive this rate change on the January 1, 2014 effective date. The rate for any individual will vary based on geographic area and benefit Plan selected.

Empire is required by New York State law to develop rates that assume at least 65% of premium revenue will be spent on health care costs, be actuarially sound, cover all claim costs, and provide a contribution to ensure adequate reserves. The percent of premium attributable to claims is essentially how much of the premium dollar is used to pay claims and is referred to as the Medical Loss Ratio (MLR). The actual MLR may vary over time based on changes in the amounts charged by hospitals, physicians, and other providers; health care trend or inflation; and health care utilization by our members. The requested increase in rates is due primarily to the annual increases in the cost of medical care. Empire has attempted to limit the rate increases to the lowest increases possible while preserving the financial integrity of the Plans. Periodic rate adjustments are necessary to secure the ability of Empire, or any insurer, to produce sufficient revenue to assure continued coverage and claim payments, both for current healthcare needs and for potential catastrophic cost situations.

In filing our rate application we were sensitive to the fact that individuals struggle to afford higher premiums. However, it is clear that an increase in premiums is necessary to assure the continued operations and viability of the Plans. Because these particular products have an especially high MLR, the failure to approve the proposed rates will only lead to the need for even greater rate increases in the future, since claim costs will eventually exceed premiums collected.

In other words, 'medical costs are going up - not necessarily ours - but let's get us some premium increases!' In a report by examiner [REDACTED] appointed by the Superintendent of Insurance for the State of New York, dated September 27, 2002, manifold irregularities were found. DFS may well need to investigate whether or not the "increasing costs" Empire HealthChoice Assurance, Inc. needs to keep up with are for legitimate costs consistent with its non-profit stated mission of insurance provision, or excesses benefitting its officers, (as was found in the referenced 2002 examination of this paragraph).

Senior citizen income isn't rising at a rate of 15% per annum. It is consistent with the responsibilities of DFS and the Superintendent of Insurance that inquiries be initiated as to just which EmpireBCBS costs (not those of medical insurers in general), have increased to more than double digit levels - are the officers and management of this enterprise contravening stated policy again for their own comfort and gain?

Thank you for your consideration.

Respectfully,
I have just been informed that my rate has been increased by $60 on my next statement. As a retired person this is going to be a great hardship; previous rate was $600; also had risen not long ago. I have no health issues and feel unfairly penalized by others that do. Please keep this in mind when you vote on this increase. Thank you for your careful attention to this matter. Very truly yours,
My premiums went from $140. to $161. and now a proposed 185.91. It's obvious the Obama Care Plan is causing many Americans to pay for all Americans who need insurance. This is absurd. Retired persons are strapped enough. We need to have supplements that can take care of us the way we expected to be taken care of medically; not forced to swallow an advantage plan HMO or PPO that gives us less than desired results. Speaking from experience with family members I've seen what happens when tests are not covered and specialists that won't see you. I'd let them write too but, they are dead! I want my supplement to be affordable. Between Medicare, Drug coverage and my supplement without the increase, is way more than I thought I would have to pay for health insurance at years old. Shame on all of you, from the President down!

To Whom It May Concern:

Empire's proposed new rates represent a 10.3% increase---well above the +/- 2% inflation rate. What's more, it comes at a time when Social Security cost-of-living adjustments are set to decrease due to a change in the COG benchmark. In addition, the proposal comes only a year after the last one, and at a time when Medicare is working to reduce its payments to providers. This means Empire's 20% may actually fall, further fattening its bottom line. Thus, one can only conclude that Empire's motives are driven by the desire for ever-higher profit margins. And because the health insurance industry successfully convinced legislators that each Medicare recipient must buy an individual supplemental policy, married couples in the system are denied the standard "family discounts" typically offered non-Medicare customers. The result: Both my wife and I are forced to purchase two identical policies---at full price!

If Empire's increase is approved, it will cost my wife and I $5,302.08 annually, or roughly 13% of our combined Social Security income. This on top of the monthly deductions for Part B and Part D coverage, and the increased Part A Deductible. Taken together, these costs amount to almost $10,000.00 annually! It's enough to make a person sick!

Sincerely,

Subject: Empire BCBS Proposed Medicare Supplement Increase

I am concerned with the incessant increases requested by Empire BCBS, notably the most recent 15% which that company advises it has filed for effect on January 1st, 2014. Retired people are assuredly not seeing increases of that magnitude in their incomes, nor has this insurer presented users justification for a rise to that extent, to their customers. Supposedly no such supporting data have been submitted to DFS, either. You good people to do what is necessary to prevent excess increases. Empire is supposedly a non-profit organization - what in heaven's name are they doing to hold down costs?

Subject: Proposed Rate Change for Empire Blue Cross

To Whom It May Concern:

I am in receipt of a letter from Empire Blue Cross proposing a rate change for my Medicare Supplemental plan, tentatively effective on January 1, 2014.

I would urge you not to approve this rate change in view of the fact that if this change is put forward it would mean that as an individual who has participated in the plan since 2010 this increase would represent a 40 percent increase over my initial rate in 2010. In the less than three years of participating in this plan I have already experienced a 20 percent increase. I think this is absolutely prohibitive, especially since these types of plans are for Senior citizens who are on fixed incomes. It would be an absolute crime for us older citizens to have to pay this horrific increase.

Please do not approve this proposed increase.
Gentlemen: I write as a senior who must pay out of pocket for supplemental health insurance premiums. In the past 2 years that I have been retired my premium with Blue Cross have increased twice. Now a new notice has arrived stating that Blue Cross wants to increase these premiums again!...Seniors must be considered when these rate increases are allowed. Our income is fixed. Our expenses are not. Therefore, I respectfully ask that you reconsidered allowing another rate increase at this time. Blue Cross must be accountable for expenses and the services rendered to individuals before we are all "included" in such rate increases. Please allow the voice of this senior to be heard. I trust you will do a benefit to ALL seniors paying high premiums to Blue Cross. Thank you for your attention to this email.
Just received a letter informing me that Empire Blue Cross Blue Shield is requesting a rather large rate increase again. This is the 4th increase in 2 years. They are not offering an increase in benefits along with this rate increase. I am a retired registered nurse on a fixed income. I know the importance of health care. However, if this rate increase is approved I will be forced to drop my Medicare Supplement plan. I implore you to NOT approve this increase in rate as it will cause major disservice to many seniors.

The proposed rate change for supplemental insurance from Empire Blue Cross Blue Shield amounts to 10% for people on fixed incomes. Since our fixed incomes are not going up at that rate, this will create a financial hardship for those who need this insurance the most. Hardly customer friendly. While I doubt this fact will change what the insurer does, the opportunity for feedback is welcomed.
To Empire BlueCross BlueShield and Health Bureau of New York State Department of Financial Services,

My only source of income is social security, and I already can’t make ends meet with the current large medical insurance premiums, and drug coverage, and co pays.

Please, please, please do not allow this premium increase – I am trying very hard to stay off of welfare.

Thank you,

Subject: Rate Increase

Due to the fact that my neighbor, does not have a computer, I am sending this request on his behalf. His name is [redacted], his phone number is [redacted]. Up to and including 11/01/12 to 02/01/13 I have been paying $583.38. The quarter 02/01/13 to 05.01/13 I was billed $606.70 marked due to recent rate change. 05/01/13 to 08/01/13 I have paid $600.87. At this time, Empire Blue Cross Blue Shield is asking for another increase of $62.76 I can neither afford to pay or drop it. I am [redacted] years old and am living on a very restricted income.

PLEASE HELP

NYS Dept. of Financial Services:

These people want $62 more from me every quarter. That's an outrageous amount! It wasn't that long ago that I paid $583 a month, then they jacked it up to $600 and now they want $662.76. I am on a fixed income and I am 75 years old. Yes, I can use a computer and email in case you are wondering. You must not allow this huge rate hike by this greedy company! They make more than enough... I already pay them far more each year that they spend on me!!!

Turn this down!
This is written to protest the Empire BCBS request for in Medicare Supplement premiums. Senior retirement incomes most assuredly are not increasing in double-digits, and this not-for-profit insurer's arguments submitted to DFS reflect alleged/supposed industry increases - none have been shown to be experiential as regards Empire BCBS. Even if justification/linkage was provided, questions would be in order as to what cost controls are in place to adequately police and preclude excesses - Empire BCBS has a documented history of executive excess. Thank you for your consideration.

I received a notice from Empire re: a proposed rate increase effective 1/1/2014. It's a 15% increase over a 10% increase made in 2013. That's a 25% increase over 2 years, a bit absurd in this economy don't you think. They keep claiming the reason is rising costs, well maybe they should look at reducing their expenses instead of passing on the costs to the customer, like taking a look at their high end salaries. These increases hit fixed income people, need I say more. A 15% increase is totally unrealistic. Unfortunately there are only a few vendors in my area code that that offer medical insurance, that's also part of the problem. We need more competition in certain parts of the state. More companies that offer medical insurance in southern NYS. That would help drive down the cost. I'm in very limited choices for supplemental medical insurance. Please do not approve this increase. Thank you.
Dear Sir or Madam:

I am respectfully seeking your assistance in stopping and denying Empire’s Supplemental Health Insurance excessive Proposed Premium increase of 15% for the 2014 year based upon the facts noted below:

1. Health Care Cost statistics documented by The Economist periodical has noted that Health Care Costs in the U.S. have only increased between 1.5 to 2% for the 2012 and 2013 years.
2. The Affordable Care Act will be reducing Health Care Costs by paying doctors for the patient’s wellness results vs. the current payment to doctors for the number of procedures performed on a patient.
3. Social Security recipients are caught in the middle between increases in Medicare Annual Premiums and the proposed excessive increase of 15% for Empire’s Supplemental Health Insurance Premiums.
4. Also, the Chained CPI will substantially limit Social Security recipients’ ability to pay for both increased Medicare Annual Premiums and the 15% proposed premium increase for Empire’s Supplemental Health Insurance.

In light of the aforementioned, I am respectfully seeking your assistance in stopping and denying Empire’s Supplemental Health Insurance excessive Proposed Premium increase of 15% for the 2014 year.

Thank you very much for your prompt attention. I look forward to receiving your response at your earliest convenience.

Sincerely,

From: NYS Department of Financial Services <portal@dfs.ny.gov>

I am writing to protest the Medicare Supplement rate change proposal filed by Empire BCBS with your department. We who are retired are most assuredly not seeing double-digit increases in our (predominantly) fixed incomes - I certainly am not.

It seems it would be almost impossible for Empire or any insurer to defend let alone promote such a monumental increase. In their letter to policyholders, reference is made to insurance industry cost increases. "Whatever", but what hasn't been furnished is numbers - the details of what have been unavoidable experiential increases in costs that prompt premium change. And any cost increases would need to be identified as indeed unavoidable and essential. I suggest there more than likely are few, if any. It is further suggested that such insurers under regulation by the State be asked to submit zero-based budgets, justifying every line item cost.

Thank you for listening.

My name is [REDACTED] and am insured by Empire Blue Cross/Blue Shield. I just received a "Proposed Rate Change Notice" letter in the mail stating that as of January, 2014 my monthly insurance premium will be going up to $220.92 for Part B. I realize that the cost of everything is going up; however what I don't understand is how, on a fixed income, I am supposed to deal with this increase. Every time we get a COLA I don't see a dime of it because my insurance premium increases, my rent increases, everything increases and I end up "two stepped". I am in this low income range and get help with my Part B deductible due to this low income range and adding another $20 a month into the mix
just pushes me back a little further instead of helping me to get ahead. I'd almost rather not getting the COLA increase because I end up with less money monthly than I did before the increase!! This is so very sad and I'm sure I'm not alone; I may be the only one venting but I'm absolutely sure many others feel the same way. Please advise if there is any way to keep the premium the same as opposed to raising it $20; I'd like to be more independent than I am but it just never seems to happen; it just saddens my heart that at times I have to reach out for help because I can't always help myself. Thank you for any feedback you can provide.

Subject: Empire BCBS Proposed Medicare Increase

I am writing to protest Empire Blue Cross Blue Shield's requested Medicare Supplement premium increase. Those of us who are retired (Medicare Supplement payers!), are least able to such large increases - I can't. No specifics nor rationale is provided, only what in effect is, "we want more money because insurance carrier costs are rising". That doesn't work for me. What has Empire done to control it's operating/administrative overhead costs? We who are retired must continually revaluate the excessive, the needful, the avoidable, etc. Has Empire done this, are they cost-mindful? Why should they be if they can simply send form letters to their insured and file rate increases with DFS?

Thank you,
Dear [Name],

I was informed by my Medical Supplement Insurance Carrier, Empire Blue Cross/Blue Shield, that they are requesting a Rate increase, on Supplement B Coverage, from $454.84 to $501.69. I am on fixed income and this increase is ridiculous. First, does your insurance board ever implement a pay decrease? It seems every year a Premium increase is ask for and your board Rubber Stamps it. Possibly costs would go down with a premium decrease or is that an idea that is confusing to you? Has anyone heard of diminishing returns? Is your function to pad the State Insurance pool which the state legislature uses as a "Piggy Bank" and the Insurance Industry knows it. Is Obamacare the BS I think it is? If you grant this rate increase all you are doing is putting more people on Medicaid who will ultimately pay for underinsured people. That number increases with this rate increase. But, then again, does your board care about the people?
