Please **do not allow Mutual of Omaha to increase their rates again.** Doctors are being paid less and patients are paying more for their insurance. Where is all of the money going?.....to the insurance companies!!! Instead of my husband being a doctor, he should have gone into the insurance business. Then we would not be struggling to pay our bills.
Enough is enough.

To whom it may concern,

I am writing this letter in regards to the 15 percent rate increase that will begin in June for Mutual of Omaha Insurance Company. I have been a member for almost three years and there has been a rate increase nearly every six months. I initially paid approximately \$230/month and as of June I will be paying \$350/month. I can no longer afford this monthly cost and if this rate increase continues as it has been I will have to drop Mutual of Omaha and find a more reasonable secondary insurance with another company! You should provide your members with other options or alternatives because these rate increases are too large and happening too close together! These rate increases are unreasonable and I cannot afford them! Your company will lose business if you continue to increase your rates as often as you do, because I am sure I am not the only member who feels this way.

Thank you for your time.

To whom it may concern. I know things are getting worse, but Mutual Of Omaha just raised the rates i Jan 2013. my coverage [REDACTED] I have a supplement for medicare. Why raise it again? in six months.?There are people like myself that can not afford these raises. I can not afford to drop my supplement as it would cost too much to go in the hospital as I am not eligible for State Aid.I wish you would reconsider for people like myself who can not afford any more increases, not to increase the rates .Yours truly

Dear Sirs:

I protest against the proposed eight percent (8%) rate increase being sought by Mutual of Omaha Insurance Co. for Medicare supplemental insurance in New York State. This is excessive. This increase come on top of a fifteen percent (15%) increase put through a year ago. No other good or service is increasing at such a rate. It is impossible for me to understand how such an increase could ever be justified, and I strongly urge the Department of Financial Services to deny the increase.

I am writing concerning the upcoming rate increase for Mutual of Omaha. Over the past years there has been a yearly increase of at least \$20.00 per year. It has come to the point that my rate will go up to \$298.08. I guess my question is are their earnings going down at this rate? It seems to be harder and harder to be on a fixed income and have these increase yearly. Medicare does not go up at this horrific rate. Please help the ones that can't afford this constant increase.

Subject : New Rate Again,

As a senior citizen, I am really tire of increase rates every year. There should be not being a new rate increase for cost of health care for people on Medicare. We are never seeing any increase security paid. I barely afford the cost to have a supplement plan now. If you increase, I will not be able to afford to have a supplement to coverage the medical expense that Medicare does not pay.
